

FCC should NOT implement any proposal that would lessen Indiana's Telephone Privacy Law protections !!

Indiana's Telephone Privacy law has been a major improvement for our life by almost eliminating the multiple interruptions, usually during our dinner hour. It has been a very welcome relief from the most irritating practice of "phone solicitation". We were receiving from 12 to 18 unsolicited calls a week. With Indiana's Telephone Privacy law, we average no more than 1 per week ! This law is one of the most important passed as it directly effects our personal lives !

Please do NOT implement any FCC changes which would Lessen the effectiveness of Indiana's Telephone Privacy law !

Thank You for the opportunity to comment.
